Powering your homes with Clean Solar Energy

- Savings in Monthly Electricity Bills (lifetime)
- Occupies only 80-100 sq. fts Roof Area per KW
- Generates 120-140 units of Energy per KW per month on an average
- Saves approx. Rs 500/- per KW per month in electricity bills
- Offsets about 1.4 tons of Carbon Emission annually per kW which is equivalent to planting 66 trees
- Reduces the burden on the Power Distribution Transformers as the energy is produced at the consumers end, thus prevents frequent faults in transformers
- Customization of the Solar Power Plants as per consumer's energy requirement to completely off-set the monthly electricity bills

Under Ministry of New & Renewable Energy (MNRE), Govt's Phase - II Rooftop Solar Mission. Domestic Electricity Consumers across the U.T can install Rooftop Solar Power Plant at Subsidized Rates (1-10 kW Capacity)
